

Zeyad Gomaa

Cairo, Egypt 01024100325 | zeyadgomaa000@gmail.com [Linkedin](#) | [Github](#)

Professional Summary

Cybersecurity graduate with a strong foundation in network security, penetration testing, vulnerability assessment, and security monitoring. Hands-on experience with Active Directory security, web application security, Linux environments, and network traffic analysis. Familiar with offensive and defensive security concepts, reconnaissance, authentication analysis, and security assessment methodologies. Currently working as a Technical Teaching Assistant at May University in Cairo, supporting technical education and student learning. Seeking opportunities to apply cybersecurity knowledge in penetration testing, security operations, or related security roles.

Technical Skills

- Cyber Security: Vulnerability Assessment, Security Monitoring, Risk Assessment, Incident Analysis
- Penetration Testing: Web Application Testing, Active Directory Security, Reconnaissance
- Network Security: TCP/IP, DNS, HTTP/HTTPS, Network Traffic Analysis
- Active Directory: Enumeration, Authentication Analysis, Access Control Review, Privilege Escalation Assessment
- Tools: Burp Suite, Wireshark, Nmap, Metasploit, BloodHound, Impacket
- Programming & Platforms: Python, Java, C++, Kali Linux, HTB Academy, PortSwigger Web Security Academy

Projects

- **Intelligent Cybersecurity Framework for Smart Grid Systems**
 - Designed a multi-layered security framework to detect and mitigate DoS, MITM, and ARP spoofing attacks
 - Implemented AI-based anomaly detection with automated response mechanisms
 - Developed centralized monitoring to secure communication across smart grid nodes
- **AI-Powered Intrusion Detection System with Arduino-Based Alerting**
 - Developed an AI-based intrusion detection model for real-time threat detection
 - Integrated Arduino microcontroller for alerting and response
 - Combined cybersecurity with embedded systems for enhanced monitoring

Experience

Technical Teaching Assistant — Computer Engineering

May University in Cairo | Cairo, Egypt

Aug 2026 – Present

- Support technical and engineering courses through student guidance, academic assistance, and clear explanations of complex concepts.
- Assist students with problem-solving, laboratory activities, and technical questions.
- Prepare and present technical content while collaborating with faculty members to support student learning.

Backend Developer Intern

Beshara Group (BG Group) | Egypt

Jun 2024 – Sep 2024

- Developed and maintained RESTful APIs using Java and PHP.
- Implemented secure coding practices and authentication mechanisms to support application security.
- Supported vulnerability assessment and network monitoring activities

Education

Bachelor of Computer Engineering, Cybersecurity Specialization

May University in Cairo | Cairo, Egypt

2022 – 2026

GPA: 3.71 / 4.0

Certifications

- Certified Ethical Hacker (CEH) — Mahara Tech
- Linux Administration (RHCSA Level 1 & 2) — Mahara Tech
- CCNA & MCSA Training
- eJPTv2 Training — Red Nexus Academy
- Red Teaming & Ethical Hacking — Red Nexus
- Training aligned with OSCP and eWPTX methodologies
